

Fluence Technology celebrates exclusive partnership with RPMC Lasers

Nov 6th 2023

Fluence Technology, a distinguished manufacturer of ultrafast femtosecond fiber lasers, is delighted to announce its exclusive distribution partnership with **RPMC Lasers**, a renowned laser distributor in North America. This partnership marks a significant step in bringing Fluence's all-fiber technology and laser solutions to customers in the United States.

This collaboration between Fluence and RPMC Lasers is set to showcase the exceptional stability and resilience of all-fiber lasers and the high-quality processing capabilities they offer. *"Fluence is excited to utilize RPMC's reach in North America, while we focus on producing robust, high-performance, and long-lasting ultrafast fiber lasers at a competitive price point"* says Dariusz Świerad, Director of Sales and Marketing at Fluence. *"Our all-fiber technology, with its extreme environmental resilience and industry-first 5-year oscillator warranty, combined with our expertise in micromachining and in-house applications testing, will resonate with customers seeking reliable material processing solutions."*

Dean Micke, President of RPMC Lasers, expressed his enthusiasm for the partnership, stating, *"The fiber laser experts at Fluence are globally recognized for their expertise in micromachining, and their capabilities in their applications*

lab are truly impressive. Our customers will be excited about their state-of-the-art custom material applications lab, enabling them to swiftly create proof-of-concept samples and provide valuable process improvement insights."

Under this partnership, RPMC Lasers will offer a range of cutting-edge products from Fluence, including the Jasper and Halite series of high-performance femtosecond fiber lasers, as well as the Fluence Oscillator, the foundation for the Jasper and Halite 2 laser systems. In addition, RPMC Lasers will provide the Harmony optical parametric amplifier, offering extensive wavelength tunability for the Jasper series, and the Blueback ultra-short pulse laser characterization device.

"This is a significant step in the global distribution of our products. We are entering the American market with a fantastic partnership with the experienced North American company RPMC, and we couldn't be more delighted with this collaboration.", says Dariusz Świerad.

About RPMC: RPMC Lasers Inc, founded in 1996, is the leading laser distributor in North America. We are an OEM supplier working with technology-leading laser manufacturers from the US and Europe. RPMC supports the Industrial, Medical, Military, and Scientific markets. RPMC offers diode lasers, laser modules, solid-state lasers and amplifiers, and fiber lasers and amplifiers. Also, we provide a wide range of custom solid-state lasers and laser diode subsystems

About Fluence Technology: Established in 2016, Fluence is a leading manufacturer of ultrafast femtosecond fiber lasers, renowned for their all-fiber technology. This unique approach ensures unprecedented stability, robustness, and resilience to environmental factors. Their lasers are free from degradable components such as SESAM, enhancing their longevity and reliability. The versatility of their ready-to-use, universal laser sources make them ideal for a wide range of materials and applications across various industries. Fluence Technology places the utmost importance on client satisfaction and is committed to delivering reliable, long-lasting, and high-quality products.
